SPECIFICATION

P-Toly Magnesium Chloride

Parameters	Specification
Appearance	Colorless liquid
Molecular Weight	150.89 g/mol
Boiling Point	66 °C
Melting Point	-100 °C
Flash Point	-40 °C
Purity	97–99%
Solubility	Soluble in THF and diethyl ether; reacts with water
Uses	Aryl Grignard reagent in organic synthesis; precursor to p-tolyl derivatives
