

SPECIFICATION

Boric Acid Crystal

Parameters	Specification
Appearance	White crystals
Molecular Weight	61.83 g/mol
Boiling Point	300 °C
Melting Point	169.6 °C
Purity	98–99%
Refractive Index	1.520
Solubility	6.8 g/100 mL at 25 °C
Uses	Buffering agent in chemical synthesis, raw material for boron compounds, glass production, antiseptic and cosmetics applications
