

## SPECIFICATION

### Carrot Oil

| Parameters       | Specification                                                       |
|------------------|---------------------------------------------------------------------|
| Appearance       | Yellow to amber liquid                                              |
| Molecular Weight | 860 g/mol                                                           |
| Boiling Point    | 300 °C                                                              |
| Melting Point    | -20 °C                                                              |
| Flash Point      | 190 °C                                                              |
| Purity           | 98–99%                                                              |
| Refractive Index | 1.467                                                               |
| Solubility       | Insoluble in water; soluble in nonpolar solvents                    |
| Uses             | Cosmetics, skincare formulations; fragrance and flavor applications |
