

## SPECIFICATION

### Catnip Essential Oil

| Parameters       | Specification                                                     |
|------------------|-------------------------------------------------------------------|
| Appearance       | Clear to pale yellow liquid                                       |
| Molecular Weight | 162.14 g/mol                                                      |
| Boiling Point    | 218 °C                                                            |
| Melting Point    | -15 °C                                                            |
| Flash Point      | 50 °C                                                             |
| Purity           | 98–99%                                                            |
| Refractive Index | 1.47                                                              |
| Solubility       | Immiscible in water; soluble in ethanol and most organic solvents |
| Uses             | Fragrance, flavoring, aromatherapy                                |
