

## SPECIFICATION

### Chelated Calcium EDTA

| Parameters       | Specification                                                         |
|------------------|-----------------------------------------------------------------------|
| Appearance       | White to off-white powder                                             |
| Molecular Weight | 336.206 g/mol                                                         |
| Boiling Point    | 240 °C                                                                |
| Melting Point    | 240 °C                                                                |
| Flash Point      | 300 °C                                                                |
| Purity           | 98–99%                                                                |
| Refractive Index | 1.5                                                                   |
| Solubility       | Soluble in water                                                      |
| Uses             | Chelating agent; stabilizer; additive for fertilizers and animal feed |
