

## SPECIFICATION

### Chiolite

| Parameters       | Specification              |
|------------------|----------------------------|
| CAS Number       | 1302-84-7                  |
| Appearance       | White crystals             |
| Molecular Weight | 461.89 g/mol               |
| Boiling Point    | 1200 °C                    |
| Melting Point    | 960 °C                     |
| Purity           | 98–99%                     |
| Refractive Index | 1.48                       |
| Solubility       | Soluble in water           |
| Uses             | Industrial fluoride source |
