# SPECIFICATION

## Chromic Acid Flakes

| Parameters | Specification |
|---|---|
| Appearance | Orange flakes |
| Molecular Formula | CrH2O4 |
| Molecular Weight | 118.01 g/mol |
| Boiling Point | 197 °C |
| Melting Point | 197 °C |
| Purity | 99–99.5% |
| Refractive Index | 1.65 |
| Solubility | Soluble in water |
| Uses | Oxidizing agent; reagent for oxidation; cleaning and etching; laboratory oxidant |
