

## SPECIFICATION

### Citronellal -Z

| Parameters       | Specification                                                                                        |
|------------------|------------------------------------------------------------------------------------------------------|
| Appearance       | Colorless to pale yellow liquid                                                                      |
| Molecular Weight | 154.25 g/mol                                                                                         |
| Boiling Point    | 214 °C                                                                                               |
| Melting Point    | -50 °C                                                                                               |
| Flash Point      | 60 °C                                                                                                |
| Purity           | 98–99%                                                                                               |
| Refractive Index | 1.457                                                                                                |
| Solubility       | Slightly soluble in water                                                                            |
| Uses             | Fragrance and flavoring agent;<br>intermediate in organic synthesis;<br>perfumery; insect repellents |
