

## SPECIFICATION

### Custard Apple Oil

| Parameters       | Specification                                                                                |
|------------------|----------------------------------------------------------------------------------------------|
| Appearance       | Pale yellow liquid                                                                           |
| Molecular Weight | 872.0 g/mol                                                                                  |
| Boiling Point    | 320.0 °C                                                                                     |
| Melting Point    | -15.0 °C                                                                                     |
| Flash Point      | 210.0 °C                                                                                     |
| Purity           | 98–99%                                                                                       |
| Refractive Index | 1.468                                                                                        |
| Solubility       | Insoluble in water; soluble in nonpolar organic solvents (chloroform, diethyl ether, hexane) |
| Uses             | Cosmetics, skincare, massage oils                                                            |
