

## SPECIFICATION

### Ethyl 3-ethoxypropionate

| Parameters       | Specification                                                  |
|------------------|----------------------------------------------------------------|
| Appearance       | Colorless liquid                                               |
| Molecular Weight | 146.18 g/mol                                                   |
| Boiling Point    | 170 °C                                                         |
| Melting Point    | -40 °C                                                         |
| Flash Point      | 42 °C                                                          |
| Purity           | 99–99.5%                                                       |
| Refractive Index | 1.414                                                          |
| Solubility       | Slightly soluble in water, miscible with most organic solvents |
| Uses             | Solvent for coatings, inks, adhesives, and specialty resins    |
