

## SPECIFICATION

### Ethyl Diglycol Acetate

| Parameters       | Specification                                             |
|------------------|-----------------------------------------------------------|
| Appearance       | Colorless liquid                                          |
| Molecular Weight | 174.19 g/mol                                              |
| Boiling Point    | 199 °C                                                    |
| Melting Point    | -20 °C                                                    |
| Flash Point      | 44 °C                                                     |
| Purity           | 98–99%                                                    |
| Refractive Index | 1.450                                                     |
| Solubility       | Slightly soluble in water, soluble in ethanol and acetone |
| Uses             | Solvent in coatings, inks, and fragrance formulations     |
