

## SPECIFICATION

### Farnesyl Acetate

| Parameters        | Specification                                            |
|-------------------|----------------------------------------------------------|
| CAS Number        | 29548-30-9                                               |
| Appearance        | Colorless liquid                                         |
| Molecular Formula | C <sub>17</sub> H <sub>28</sub> O <sub>2</sub>           |
| Molecular Weight  | 264.41 g/mol                                             |
| Boiling Point     | 260 °C                                                   |
| Melting Point     | -20 °C                                                   |
| Flash Point       | 95 °C                                                    |
| Purity            | 98–99%                                                   |
| Refractive Index  | 1.458                                                    |
| Solubility        | Insoluble in water; soluble in organic solvents          |
| Uses              | Fragrance ingredient; intermediate for organic synthesis |
