

## SPECIFICATION

### Ferrous Sulfate 7-Hyd LR

| Parameters       | Specification                                       |
|------------------|-----------------------------------------------------|
| Appearance       | Green crystals                                      |
| Molecular Weight | 278.02 g/mol                                        |
| Boiling Point    | 68 °C                                               |
| Melting Point    | 64 °C                                               |
| Flash Point      | 0 °C                                                |
| Purity           | 98–99%                                              |
| Solubility       | Soluble in water                                    |
| Uses             | Laboratory reagent, iron source, analytical reagent |
