

## SPECIFICATION

### Fougere Absolute

| Parameters       | Specification                                                                |
|------------------|------------------------------------------------------------------------------|
| Appearance       | Dark amber viscous liquid                                                    |
| Molecular Weight | 279.36 g/mol                                                                 |
| Boiling Point    | 240 °C                                                                       |
| Melting Point    | 36 °C                                                                        |
| Flash Point      | 70 °C                                                                        |
| Purity           | 98–99%                                                                       |
| Refractive Index | 1.477                                                                        |
| Solubility       | Soluble in ethanol; insoluble in water                                       |
| Uses             | Fragrance ingredient used to impart fougere character; perfumery application |
