

## SPECIFICATION

### Hydroxypropyl Methylcellulose

| Parameters       | Specification                                                        |
|------------------|----------------------------------------------------------------------|
| Appearance       | White to off-white powder                                            |
| Molecular Weight | 100000 g/mol                                                         |
| Boiling Point    | 300 °C                                                               |
| Melting Point    | 260 °C                                                               |
| Flash Point      | 180 °C                                                               |
| Purity           | 98–99%                                                               |
| Refractive Index | 1.5                                                                  |
| Solubility       | Soluble in water                                                     |
| Uses             | Thickener, binder, and excipient in pharmaceutical and food products |
