

## SPECIFICATION

### IPL-Thalonil

| Parameters       | Specification                                                |
|------------------|--------------------------------------------------------------|
| Appearance       | White crystalline solid                                      |
| Molecular Weight | 265.9 g/mol                                                  |
| Boiling Point    | 315 °C                                                       |
| Melting Point    | 169 °C                                                       |
| Flash Point      | 120 °C                                                       |
| Purity           | 98–99%                                                       |
| Refractive Index | 1.571                                                        |
| Solubility       | Slightly soluble in water; soluble in acetone and chloroform |
| Uses             | Fungicide for crop protection                                |
