

## SPECIFICATION

### Marigold Extract

| Parameters       | Specification                                         |
|------------------|-------------------------------------------------------|
| Appearance       | Bright yellow to orange powder                        |
| Molecular Weight | 568.87 g/mol                                          |
| Boiling Point    | 360 °C                                                |
| Melting Point    | 184 °C                                                |
| Flash Point      | 250 °C                                                |
| Purity           | 95–99%                                                |
| Refractive Index | 1.6                                                   |
| Solubility       | Soluble in acetone and ethanol;<br>insoluble in water |
| Uses             | Colorant; dietary supplement<br>ingredient            |
