

## SPECIFICATION

### Melon Diffuser Oil

| Parameters       | Specification                                                    |
|------------------|------------------------------------------------------------------|
| Appearance       | Colorless to pale yellow liquid                                  |
| Molecular Weight | 200.0 g/mol                                                      |
| Boiling Point    | 230 °C                                                           |
| Melting Point    | -20 °C                                                           |
| Flash Point      | 60 °C                                                            |
| Purity           | 98–99%                                                           |
| Refractive Index | 1.463                                                            |
| Solubility       | Soluble in alcohol and most organic solvents; insoluble in water |
| Uses             | Fragrance, perfumery, air freshener applications                 |
