

## SPECIFICATION

### Neem Tulsi Diffuser Oil

| Parameters       | Specification                                                     |
|------------------|-------------------------------------------------------------------|
| Appearance       | Clear yellow liquid                                               |
| Molecular Weight | 860 g/mol                                                         |
| Boiling Point    | 360 °C                                                            |
| Melting Point    | -6 °C                                                             |
| Flash Point      | 60 °C                                                             |
| Purity           | 98–99%                                                            |
| Refractive Index | 1.467                                                             |
| Solubility       | Insoluble in water; soluble in alcohols and most organic solvents |
| Uses             | Aromatherapy and diffuser use                                     |
