

## SPECIFICATION

### Organic Cumin Aldehyde

| Parameters       | Specification                                                      |
|------------------|--------------------------------------------------------------------|
| Appearance       | Colorless to pale yellow liquid                                    |
| Molecular Weight | 148.20 g/mol                                                       |
| Boiling Point    | 251 °C                                                             |
| Melting Point    | -9 °C                                                              |
| Flash Point      | 82 °C                                                              |
| Purity           | 98–99%                                                             |
| Refractive Index | 1.521                                                              |
| Solubility       | Sparingly soluble in water; soluble in ethanol and diethyl ether   |
| Uses             | Flavor and fragrance ingredient; intermediate in organic synthesis |
