

## SPECIFICATION

### Organic Elemi Oil

| Parameters       | Specification                                                |
|------------------|--------------------------------------------------------------|
| Appearance       | Pale yellow to amber liquid                                  |
| Molecular Weight | 222.36 g/mol                                                 |
| Boiling Point    | 190 °C                                                       |
| Melting Point    | -20 °C                                                       |
| Flash Point      | 60 °C                                                        |
| Purity           | 98–99%                                                       |
| Refractive Index | 1.48                                                         |
| Solubility       | Soluble in alcohols and organic solvents; insoluble in water |
| Uses             | Fragrance and perfumery; flavoring; cosmetics                |
