

## SPECIFICATION

### PEG-20 Stearate

| Parameters       | Specification                               |
|------------------|---------------------------------------------|
| Appearance       | White solid                                 |
| Molecular Weight | 1147 g/mol                                  |
| Boiling Point    | 360 °C                                      |
| Melting Point    | 52 °C                                       |
| Flash Point      | 190 °C                                      |
| Purity           | 98–99%                                      |
| Refractive Index | 1.46                                        |
| Solubility       | Soluble in water                            |
| Uses             | Emulsifier, surfactant, cosmetic ingredient |
