

## SPECIFICATION

### PEG-35 Stearate

| Parameters       | Specification                                                                                |
|------------------|----------------------------------------------------------------------------------------------|
| Appearance       | White to off-white waxy solid                                                                |
| Molecular Weight | 1806 g/mol                                                                                   |
| Boiling Point    | 350 °C                                                                                       |
| Melting Point    | 40 °C                                                                                        |
| Flash Point      | 170 °C                                                                                       |
| Purity           | 98–99%                                                                                       |
| Refractive Index | 1.46                                                                                         |
| Solubility       | Soluble in water and many organic solvents                                                   |
| Uses             | Emulsifier, surfactant, thickener, and lubricant in cosmetics and personal care formulations |
