

## SPECIFICATION

### PEG-80 Sorbitan laurate

| Parameters       | Specification                                                       |
|------------------|---------------------------------------------------------------------|
| Appearance       | Colorless to pale yellow liquid                                     |
| Molecular Weight | 4200 g/mol                                                          |
| Boiling Point    | 350 °C                                                              |
| Melting Point    | -20 °C                                                              |
| Flash Point      | 210 °C                                                              |
| Purity           | 98–99%                                                              |
| Refractive Index | 1.46                                                                |
| Solubility       | Soluble in water                                                    |
| Uses             | Emulsifier, surfactant, stabilizer in cosmetics and pharmaceuticals |
