

## SPECIFICATION

### Polyoxyethylene Dioleate

| Parameters        | Specification                                               |
|-------------------|-------------------------------------------------------------|
| CAS Number        | 2595236                                                     |
| Appearance        | Pale yellow to colorless viscous liquid                     |
| Molecular Formula | C38H70O4                                                    |
| Molecular Weight  | 970 g/mol                                                   |
| Boiling Point     | 300 °C                                                      |
| Melting Point     | -5 °C                                                       |
| Flash Point       | 180 °C                                                      |
| Purity            | 98–99%                                                      |
| Refractive Index  | 1.455                                                       |
| Solubility        | Soluble in most organic solvents; slightly soluble in water |
| Uses              | Surfactant; emollient; emulsifier                           |
