

SPECIFICATION

Potassium Bromide Powder

Parameters	Specification
Appearance	White powder
Molecular Weight	119.00 g/mol
Boiling Point	1410 °C
Melting Point	734 °C
Purity	99–99.5%
Refractive Index	1.516
Solubility	Soluble in water
Uses	Used in photography, analytical chemistry, and as a reagent in organic synthesis, historically used as a sedative in medicine
