

## SPECIFICATION

### Rosewood Oil

| Parameters       | Specification                                                     |
|------------------|-------------------------------------------------------------------|
| Appearance       | Colorless to pale yellow liquid                                   |
| Molecular Weight | 204.0 g/mol                                                       |
| Boiling Point    | 190 °C                                                            |
| Melting Point    | -60 °C                                                            |
| Flash Point      | 60 °C                                                             |
| Purity           | 98–99%                                                            |
| Refractive Index | 1.472                                                             |
| Solubility       | Insoluble in water; soluble in ethanol and other organic solvents |
| Uses             | Fragrance, perfumery, flavoring, cosmetics                        |
