SPECIFICATION

Silver Sulphate AR

Parameters	Specification
Appearance	White crystalline powder
Molecular Weight	311.79 g/mol
Boiling Point	1060 °C
Melting Point	580 °C
Purity	99–99.9%
Solubility	Sparingly soluble in water, 0.83 g per 100 g water at 20 °C
Uses	Analytical reagent, precipitation reactions, photography, silver plating
