

SPECIFICATION

Sodium Borohydride LR

Parameters	Specification
Appearance	White crystalline powder
Molecular Weight	37.83 g/mol
Boiling Point	520 °C
Melting Point	408 °C
Purity	98–99%
Refractive Index	1.420
Solubility	Soluble in water, hydrolyzes slowly
Uses	Reducing agent in organic synthesis, used for the preparation of aldehydes, alcohols, and other boron-containing compounds
