

## SPECIFICATION

### Super Potassium Humate Flakes

| Parameters       | Specification                                         |
|------------------|-------------------------------------------------------|
| Appearance       | Dark brown to black flakes                            |
| Molecular Weight | 10000 g/mol                                           |
| Boiling Point    | 400 °C                                                |
| Melting Point    | 180 °C                                                |
| Flash Point      | 250 °C                                                |
| Purity           | 75–85%                                                |
| Refractive Index | 1.52                                                  |
| Solubility       | Soluble in water                                      |
| Uses             | Soil conditioner; fertilizer additive; seed treatment |
