

## SPECIFICATION

### Thujopsene

| Parameters        | Specification                                                                          |
|-------------------|----------------------------------------------------------------------------------------|
| CAS Number        | 470-40-6                                                                               |
| Appearance        | Colorless liquid                                                                       |
| Molecular Formula | C <sub>15</sub> H <sub>24</sub>                                                        |
| Molecular Weight  | 204.37 g/mol                                                                           |
| Boiling Point     | 246 °C                                                                                 |
| Melting Point     | -58 °C                                                                                 |
| Flash Point       | 60 °C                                                                                  |
| Purity            | 98-99%                                                                                 |
| Refractive Index  | 1.5                                                                                    |
| Solubility        | Insoluble in water; soluble in organic solvents (e.g., ethanol, diethyl ether, hexane) |
| Uses              | Fragrance ingredient; intermediate for fragrance and flavor applications               |
