

## SPECIFICATION

### Valakon

| Parameters       | Specification                               |
|------------------|---------------------------------------------|
| Appearance       | White powder                                |
| Molecular Weight | 180.60 g/mol                                |
| Boiling Point    | 280 °C                                      |
| Melting Point    | 122 °C                                      |
| Flash Point      | 180 °C                                      |
| Purity           | 98–99%                                      |
| Refractive Index | 1.5                                         |
| Solubility       | Soluble in water                            |
| Uses             | Analytical reagent; pharmaceutical research |
