

## SPECIFICATION

### Benzyl Cyanide

| Parameters        | Specification                                                |
|-------------------|--------------------------------------------------------------|
| Cas Number        | 140-29-4                                                     |
| Appearance        | Colorless Liquid                                             |
| Uses              | Used In Organic Synthesis, Flavors, And Fragrances           |
| Molecular Formula | $C_8H_7N$                                                    |
| Molecular Weight  | 117.15 G/Mol                                                 |
| Density           | 1.013-1.015 G/ML At 25°C                                     |
| Flash Point       | 101°C-103°C                                                  |
| Melting Point     | 23°C-25°C                                                    |
| Purity            | 96-98%                                                       |
| Solubility        | Insoluble In Water, Soluble In Ether, Acetone, Alcohol       |
| Hazards           | Fatal If Inhaled, Toxic If Swallowed, Causes Skin Irritation |
| Vapor Pressure    | 0.97-0.1 MmHg At 20°C                                        |
