

## SPECIFICATION

### Turpentine Oil

| Parameters        | Specification                                                                                    |
|-------------------|--------------------------------------------------------------------------------------------------|
| Cas Number        | 8006-64-2                                                                                        |
| Appearance        | Yellow To Colorless Liquid                                                                       |
| Uses              | Used As A Solvent, In Varnishes, And As A Raw Material For Organic Synthesis                     |
| Molecular Formula | $C_{10}H_{16}$                                                                                   |
| Vapor Pressure    | 2- 4 MmHg At -6.7°C                                                                              |
| Density           | 0.86 G/ML At 25°C                                                                                |
| Boiling Point     | 153°C -175°C                                                                                     |
| Refractive Index  | N20/D 1.4670-1.4780                                                                              |
| Solubility        | Insoluble In Water, Soluble In Ethanol                                                           |
| Hazards           | Flammable Liquid, Harmful If Swallowed, Causes Skin Irritation, May Cause Allergic Skin Reaction |
| Vapor Pressure    | 2- 4 MmHg At - 6.7°C                                                                             |
