

## SPECIFICATION

### Oleamide

| Parameters        | Specification                                                           |
|-------------------|-------------------------------------------------------------------------|
| Cas Number        | 301-02-0                                                                |
| Appearance        | White To Light Yellow Powder Or Crystalline Solid                       |
| Uses              | Sleep-Inducing Lipid; Cannabinoid-Like Activity; Lubricant; Surfactant  |
| Molecular Formula | $C_{18}H_{35}NO$                                                        |
| Molecular Weight  | 281.48 G/Mol                                                            |
| Melting Point     | 65–75 °C                                                                |
| Flash Point       | 207 °C (Closed Cup)                                                     |
| Solubility        | Insoluble In Water; Soluble In Hot Ethanol, Ether, And Organic Solvents |
| Hazards           | May Cause Skin/Eye Irritation; Respiratory Sensitization Possible       |
| Purity            | 96-98%                                                                  |
