

## SPECIFICATION

### Geranyl Linalool

| Parameters        | Specification                                                                                                                                    |
|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| Cas Number        | 1113-21-9                                                                                                                                        |
| Appearance        | Colorless To Pale Yellow Clear Liquid                                                                                                            |
| Uses              | Fragrance Ingredient In Perfumes, Soaps, And Cosmetics, Intermediate In Teprenone Synthesis, Studied For Insecticidal And Antioxidant Properties |
| Molecular Formula | $C_{20}H_{34}O$                                                                                                                                  |
| Molecular Weight  | 290.49 G/Mol                                                                                                                                     |
| Boiling Point     | 250 °C                                                                                                                                           |
| Flash Point       | 160 °C                                                                                                                                           |
| Solubility        | Insoluble In Water Slightly Soluble In Methanol, Chloroform, Ethyl Acetate                                                                       |
| Hazards           | H315: Causes Skin Irritation, H319: Causes Serious Eye Irritation, H335: May Cause Respiratory Irritation                                        |
| Purity            | 90.0%–95.0%                                                                                                                                      |
| Refractive Index  | 1.486–1.492                                                                                                                                      |
