

## SPECIFICATION

### Phenylacetaldehyde

| Parameters        | Specification                                                                                   |
|-------------------|-------------------------------------------------------------------------------------------------|
| Cas Number        | 122-78-1                                                                                        |
| Appearance        | Clear, Colorless To Pale Yellow Oily Liquid                                                     |
| Uses              | Perfumes, Insect Attractants, And Blacklight Traps                                              |
| Molecular Formula | C <sub>8</sub> H <sub>8</sub> O                                                                 |
| Molecular Weight  | 120.15 G/Mol                                                                                    |
| Boiling Point     | 195 °C                                                                                          |
| Flash Point       | 68 °C (Closed Cup)                                                                              |
| Solubility        | Slightly Soluble In Water; Soluble In Alcohols And Diethyl Ether                                |
| Hazards           | Harmful If Swallowed; Causes Severe Skin Burns And Eye Damage; May Cause Allergic Skin Reaction |
| Purity            | 90-98%                                                                                          |
| Refractive Index  | 1.535                                                                                           |
