

## SPECIFICATION

### Citronella

| Parameters        | Specification                                                                                                |
|-------------------|--------------------------------------------------------------------------------------------------------------|
| Cas Number        | 106-23-0                                                                                                     |
| Appearance        | Colorless To Pale Yellow Liquid                                                                              |
| Uses              | Fragrance Ingredient; Insect Repellent; Intermediate In Terpenoid Synthesis; Used In Flavor And Perfumery    |
| Molecular Formula | $C_{10}H_{18}O$                                                                                              |
| Molecular Weight  | 154.25 G/Mol                                                                                                 |
| Boiling Point     | 207 °C                                                                                                       |
| Flash Point       | 74 °C (Closed Cup)                                                                                           |
| Solubility        | Slightly Soluble In Water; Soluble In Ethanol And Organic Solvents                                           |
| Hazards           | Causes Skin Irritation (H315); May Cause Allergic Skin Reaction (H317); Causes Serious Eye Irritation (H319) |
| Purity            | 93-95%                                                                                                       |
| Refractive Index  | 1.451 @ 20 °C                                                                                                |
