## SPECIFICATION

### Methyl Heptene Carbonate

| Parameters        | Specification                                                             |
|-------------------|---------------------------------------------------------------------------|
| Cas Number        | 111-12-6                                                                  |
| Appearance        | Clear, Colorless To Pale Yellow Liquid                                    |
| Uses              | Flavoring Agent, Fragrance Ingredient, Intermediate In Chemical Synthesis |
| Molecular Formula | $C_9H_{14}O_2$                                                            |
| Molecular Weight  | 154.21 G/Mol                                                              |
| Boiling Point     | 217–220 °C (Lit.)                                                         |
| Flash Point       | 89–95 °C (Closed Cup)                                                     |
| Solubility        | Insoluble In Water; Soluble In Organic Solvents                           |
| Purity            | 96-98%                                                                    |
| Refractive Index  | 1.4440–1.4520                                                             |
