

## SPECIFICATION

### Exaltenone

| Parameters        | Specification                                                                      |
|-------------------|------------------------------------------------------------------------------------|
| Cas Number        | 14595-54-1                                                                         |
| Appearance        | Colorless To Pale Yellow Liquid                                                    |
| Uses              | Musky Fragrance Ingredient; Used In Fine Fragrances, Shampoos, Detergents, Candles |
| Molecular Formula | C <sub>15</sub> H <sub>26</sub> O                                                  |
| Molecular Weight  | 222.37 G/Mol                                                                       |
| Flash Point       | >200 °F                                                                            |
| Solubility        | Highly Soluble In Organic Solvents But Essentially Insoluble In Water              |
| Hazards           | Causes Mild Skin Irritation                                                        |
| Purity            | 93-95%                                                                             |
