

## SPECIFICATION

### Cinnamalva

| Parameters        | Specification                               |
|-------------------|---------------------------------------------|
| Appearance        | Pale yellow liquid                          |
| Uses              | Used in oriental, spicy, and floral accords |
| Molecular Formula | C9H7N                                       |
| Molecular Weight  | ~190 g/mol                                  |
| Boiling Point     | ~250 °C                                     |
| Flash Point       | ~95 °C                                      |
| Solubility        | Soluble in alcohols, oils                   |
| Hazards           | H315, H319 (skin/eye irritant)              |
| Purity            | ≥98%                                        |
| Refractive Index  | ~1.48                                       |
