

## SPECIFICATION

### Decatone

| Parameters        | Specification                                                                  |
|-------------------|--------------------------------------------------------------------------------|
| CAS Number        | 34131-98-1                                                                     |
| Appearance        | Colorless liquid                                                               |
| Uses              | Fragrance raw material; perfumery industry; soaps, beauty products, detergents |
| Molecular Formula | C <sub>13</sub> H <sub>22</sub> O                                              |
| Molecular Weight  | 194.31 g/mol                                                                   |
| Boiling Point     | 274.4 °C                                                                       |
| Flash Point       | 112.3 °C                                                                       |
| Solubility        | Soluble in chloroform                                                          |
| Hazards           | Skin irritation (Category 2); GHS07 symbol; Hazard statement H315              |
| Purity            | 93-95%                                                                         |
| Refractive Index  | 1.473                                                                          |
