

## SPECIFICATION

### Methyl Cyclogeranate

| Parameters        | Specification                                                            |
|-------------------|--------------------------------------------------------------------------|
| Appearance        | Colorless to pale yellow liquid                                          |
| Molecular Formula | C <sub>12</sub> H <sub>20</sub> O <sub>2</sub>                           |
| Molecular Weight  | 196.29 g/mol                                                             |
| Boiling Point     | 210 °C                                                                   |
| Flash Point       | 85 °C                                                                    |
| Purity            | ≥ 98%                                                                    |
| Refractive Index  | 1.464                                                                    |
| Solubility        | Slightly soluble in water, soluble in organic solvents                   |
| Uses              | Flavoring agent, Fragrance ingredient, Intermediate in organic synthesis |
