

## SPECIFICATION

### Exaltolide Total

| Parameters        | Specification                                  |
|-------------------|------------------------------------------------|
| Appearance        | White crystalline solid                        |
| Molecular Formula | C <sub>13</sub> H <sub>24</sub> O <sub>2</sub> |
| Molecular Weight  | 240.39 g/mol                                   |
| Boiling Point     | 150 °C                                         |
| Flash Point       | 100 °C                                         |
| Purity            | ≥ 98%                                          |
| Solubility        | Soluble in organic solvents                    |
| Uses              | Perfume compositions; musk substitute          |
