

## SPECIFICATION

### Delphol Hc

| Parameters        | Specification                                                                               |
|-------------------|---------------------------------------------------------------------------------------------|
| Appearance        | Colorless liquid                                                                            |
| Molecular Formula | C <sub>10</sub> H <sub>20</sub> O                                                           |
| Molecular Weight  | 156 g/mol                                                                                   |
| Flash Point       | 95 °C                                                                                       |
| Purity            | ≥ 95%                                                                                       |
| Refractive Index  | 1.457–1.461                                                                                 |
| Solubility        | Soluble in organic solvents;<br>Insoluble in water                                          |
| Uses              | Fragrance in perfumes and<br>cosmetics, soaps, detergents, Insect<br>repellent formulations |
