

## SPECIFICATION

### Cetylia Base

| Parameters        | Specification                                   |
|-------------------|-------------------------------------------------|
| Appearance        | Clear, slightly viscous liquid                  |
| Molecular Formula | C16H34                                          |
| Molecular Weight  | 242.43 g/mol                                    |
| Boiling Point     | 340 °C                                          |
| Flash Point       | 150 °C                                          |
| Purity            | ≥ 95%                                           |
| Refractive Index  | 1.437                                           |
| Solubility        | Insoluble in water; soluble in organic solvents |
| Uses              | Emulsifier, Surfactant, Thickening agent        |
