

## SPECIFICATION

### Cyclomethylene Citronellol

| Parameters        | Specification                                                                                 |
|-------------------|-----------------------------------------------------------------------------------------------|
| Appearance        | Colorless to pale yellow liquid                                                               |
| Molecular Formula | C <sub>10</sub> H <sub>18</sub> O                                                             |
| Molecular Weight  | 154.25 g/mol                                                                                  |
| Boiling Point     | 230°C                                                                                         |
| Flash Point       | 90°C                                                                                          |
| Purity            | ≥ 95%                                                                                         |
| Refractive Index  | 1.462                                                                                         |
| Solubility        | Soluble in alcohol, slightly soluble in water                                                 |
| Uses              | Perfumery (soft floral effects, harmonizer in rose/muguet accords, fine fragrances, shampoos) |
