

## SPECIFICATION

### Camphor GF

| Parameters        | Specification                                                                                                    |
|-------------------|------------------------------------------------------------------------------------------------------------------|
| Appearance        | White crystalline solid                                                                                          |
| Molecular Formula | C <sub>10</sub> H <sub>16</sub> O                                                                                |
| Molecular Weight  | 152.23 g/mol                                                                                                     |
| Boiling Point     | 204 °C                                                                                                           |
| Flash Point       | 148 °F                                                                                                           |
| Purity            | 93-95%                                                                                                           |
| Refractive Index  | 1.546                                                                                                            |
| Solubility        | Soluble in acetone, ethanol, diethyl ether, chloroform, acetic acid; slightly soluble in water                   |
| Uses              | Pharmaceuticals (topical analgesic, decongestant), fragrances, insect repellent, plastics, explosives stabilizer |
