

## SPECIFICATION

### Farenal

| Parameters        | Specification                                                          |
|-------------------|------------------------------------------------------------------------|
| Appearance        | Colorless to pale yellow liquid                                        |
| Molecular Formula | C <sub>14</sub> H <sub>26</sub> O                                      |
| Molecular Weight  | 210.36 g/mol                                                           |
| Boiling Point     | 299.9 °C                                                               |
| Flash Point       | 110 °C                                                                 |
| Purity            | 93-95%                                                                 |
| Refractive Index  | 1.4557                                                                 |
| Solubility        | Poorly soluble in water (~670 µg/L at 20 °C); soluble in ethanol       |
| Uses              | Fragrance ingredient in perfumes, soaps, shampoos, detergents, candles |
