

## SPECIFICATION

### Polyquaternium 47

| Parameters        | Specification                                                    |
|-------------------|------------------------------------------------------------------|
| CAS Number        | 197969-51-0                                                      |
| Appearance        | White to off-white powder                                        |
| Molecular Formula | C17H31ClN2O5                                                     |
| Molecular Weight  | 378.89 g/mol                                                     |
| Purity            | 93-95%                                                           |
| Solubility        | Soluble in water                                                 |
| Uses              | Hair care, conditioning agent, film former, improves combability |
